

MADHAV BANJADE

FULL STACK DEVELOPER

madhavbnzd57@gmail.com

Kathmandu, Nepal

Github: /madhavbanjade

ABOUT

Full-Stack Developer based in Kathmandu, Nepal, with 1.5 years of professional experience building modern, scalable web applications. Specialise in frontend development with Next.js and TypeScript, complemented by backend experience with Node.js and SQL/NOSQL Databases. Comfortable taking products from architecture through to deployment and contributing to teams at every stage of the development lifecycle.

EXPERIENCE

Frontend Developer | Lishnu Tech

2025–Present

Contributed to production features, REST/GraphQL API integrations, and end-to-end deliveries. Collaborated with design and product teams across the full development cycle to ship reliable, high-quality software.

Mern Stack Internship | Nnine Solution

2024

6-month frontend internship focused on building UI components, integrating REST APIs, and improving codebase quality under senior developer mentorship.

PROJECTS

HRN Nepal – Management System

Next.js. NestJS TypeScript MongoDB. Redis AWS . AI Integration

Large-scale management platform for an educational consultancy that sends students to Japan for work and study. H employee records, student tracking, attendance, AI-assisted CV generation, document verification, and complete visa workflows. Reduced manual administrative workload by 80%.

E-commerce Platform

Next.js. NestJS TypeScript PostgreSQL. Prisma TailwindCSS

Fashion e-commerce application with OAuth/JWT auth, role-based access, product management, cart and wishlist, o tracking, and secure payment integration. Achieved 72% improvement in checkout completion rate during testing.

GharJagga Nepal — Real Estate Platform

Express · React · MongoDB · Node.js · TailwindCSS

Property search platform for Nepal with map-based filtering, agent dashboard, and listing management. Reached 3× more listings than the nearest competitor with 2,000+ active users in the first 3 months after launch.
