

MADHAV BANJADE

Software Engineer

madhavbnzd57@gmail.com | Kathmandu, Nepal | github.com/madhavbanjade

PROFILE

Software engineer with 8 months of hands-on, mentor-guided experience building a real production system, plus a 6-month internship in a professional codebase. Comfortable working across the stack — from UI to APIs to data models — and has a working understanding of how a live system is actually built, shipped, and maintained. Still early in a formal corporate career, but has learned by doing rather than by theory alone.

EXPERIENCE

Full Stack Developer (Guided/Trainee role) — HRN Management and Company 8 months

Hands-on project work under a senior engineer's guidance — not an independent professional role yet.

- Built and shipped features end-to-end on a live production system under senior guidance, learning first-hand how a real dev lifecycle works from requirement to deployment.
- Built and integrated REST and GraphQL APIs to connect frontend and backend services.
- Worked with design and product teams to turn requirements into working features, gaining exposure to how real teams plan and coordinate software delivery.

MERN Stack Intern — Nnine Solution 2024 · 6 months

- Built reusable UI components inside a MERN-stack production codebase under senior developer mentorship.
- Integrated REST APIs connecting frontend interfaces with backend services.
- Completed a 6-month structured internship focused on engineering practices, code quality, and collaborative development.

PROJECTS

HRN Nepal — System Dashboard — Next.js · NestJS · TypeScript · MongoDB · Redis · AI

- Contributed to a large-scale management system for an SSW visa consultancy — modules for employee records, student tracking, and attendance.
- Helped build automatic CV generation, document verification, and end-to-end visa processing workflows.

Tailoring Management System — NestJS · MongoDB

- Built backend architecture for a tailoring business MIS, including CRUD, authentication, and data models for orders, inventory, and customers.

E-commerce Platform — Next.js · NestJS · TypeScript · PostgreSQL · Prisma · Tailwind

- Implemented OAuth/JWT auth and role-based access control; built product, cart, wishlist, order tracking, and payment integration.

GharJagga Nepal — Real Estate Platform — Express · React · MongoDB · Tailwind

- Built a property search platform with map-based filtering, agent dashboard, listing management, messaging, and photo uploads.

EDUCATION

Bachelor of Information Technology (Hons), Computing — Phoenix College of Management & IT / Lincoln

University College Nov 2023 – Present

SKILLS

Frontend: React, Next.js, TypeScript, TailwindCSS, Redux, React Query, Framer Motion, Formik

Mobile: Flutter

Backend: NestJS, Node.js, Express, REST API, GraphQL, JWT / OAuth

Databases: MongoDB, PostgreSQL, Redis, Prisma ORM, Firebase

Tools: Git, GitHub, Docker, AWS, Postman, Figma

Languages: English
